

"I cold-emailed 200 people at Zomato, CRED, and Razorpay. Got 3 replies in 2 months. My batchmate got a meeting in 2 days because he knew someone who knew someone. So I built the tool to find that someone."

WarmPath

Turn your network into your pipeline. Warm intros, not cold email.

Import your network once. WarmPath finds the shortest warm path to any prospect and sends the intro in 60 seconds.

\$375 / mo

WHAT \$375/MONTH BUYS YOU

Cold Email (after 90 days warming)

Warm Intro (first-degree referral)

<2%

~18%

9x

more replies with a warm intro — zero cold email spend

Gmail bulk-sender rules tightened. AI spam filters learn fast.
Domains burn in weeks. The tools aren't the problem.

Email warming treats the symptom.

The disease is cold outreach itself. Nobody wants email from strangers. The fix isn't better warming. The fix is never sending cold email.

THE FUNDAMENTAL SHIFT

70%

of enterprise deals close through
a warm introduction, not a cold email.

WARM PATH

You > Mutual > VP replies in 4
hrs ✓

*The warm path exists inside every professional network.
The problem is finding it systematically and fast.*

| HOW WARMPATH SOLVES IT

STEP 1

**You want to reach
Rahul at Zomato**

Enter the prospect. WarmPath
takes it from here.

STEP 2

**WarmPath maps
every connection**

LinkedIn, Gmail, alumni, investors.
Every connection graphed and
scored automatically.

STEP 3

**Priya knows Rahul
2 hops. 91% warmth.**

Best path ranked by warmth
score. You see exactly who to ask
and why.

STEP 4

**Intro drafted
and sent in 60 sec**

AI writes the ask. You approve.
No cold email. No domain
burning.

60 sec

prospect to intro sent

⚡ Signal: Zomato posted "Expanding B2B supply chain platform" 3 days ago

Hi Rahul, Priya Mehta suggested I reach out she mentioned your expansion into Zomato's B2B supply chain and the vendor onboarding bottleneck you're solving. I'm building WarmPath, a relationship intelligence platform that helps BD teams cut enterprise outreach cycles by 60%. Worth a 20-min call? [AI drafted 94% personalisation score]

Discovery Engine

Graph pathfinding maps 1st, 2nd-degree and alumni nodes. Ranks every path by warmth score. Surfaces the strongest intro chain in <100ms.

AI Personalisation

Claude AI uses live company signals, mutual connection history, and your knowledge base to draft intros that feel human, not templated.

Omnichannel Queue

Unified inbox across Email, LinkedIn, WhatsApp, Telegram, and Meta Ads. One approval flow no tab-switching between 5 tools.

MVP Status: All 3 engines live Built solo in 3 months

THE PATHFINDING ENGINE

How the Engine Scores Paths

Most tools give you a list. WarmPath runs a real graph traversal scoring every path by relationship warmth, then ranking by the weakest link in the chain. Not a recommendation engine. An actual path.

$$W_{\text{path}} = \min(W_1, W_2 \dots W_n) \times (1 / \text{hops}^{0.5})$$

each $W_i = \text{relationship_type} \times \text{recency} \times \text{strength}$

W_i Recency × Frequency × Relationship type — scored per edge

$\min()$ Weakest link wins — one cold handoff kills the entire path

$\text{hops}^{0.5}$ Length penalty — shorter paths rank higher, all else equal

LIVE PATH RANKING: "REACH RAHUL AT ZOMATO"

You > Priya Mehta > Rahul

SELECTED

Hops: 2 Recency: 14d Freq: High W = 91%

You > Raj Sharma > Ankit > Rahul

Hops: 3 Recency: 62d Freq: Low W = 54%

You > LinkedIn contact > Unknown > Rahul

Hops: 3 Recency: 180d+ Freq: None W = 18%

Algorithm evaluates every candidate path in <100ms. Only the strongest warm path reaches your approval queue.

WHO WE SERVE FIRST

PRIMARY ICP SEED WEDGE

Indian B2B Founders Selling into US & Singapore Enterprise

Seed · Series B Founder-led sales High-value enterprise deals

- **10+ hrs/week** on manual research and cold outreach with <2% reply rates
- No systematic way to find who in their BITS/IIT/investor network connects to the target VP
- US tools Apollo, Clay, SalesNav cost \$150–500/month and ignore Indian relationship networks entirely

YEAR 2 EXPANSION

SDRs & AEs B2B SaaS Teams

1–2 replies per 100 cold emails. 65% of quota misses are an access problem, not an effort problem.

Sales Leaders VP Sales / Head of Growth

6.8 stakeholders per enterprise deal, no shared graph, 3 subscriptions still no warm path.

IT Services & Agencies ₹10Cr–₹100Cr

60% of IT revenue comes from referrals but that network lives in WhatsApp chats, not any system.

Why this wedge: First 100 users from BITS/IIT/IIM alumni networks. Direct founder access, high trust, high deal value.

MARKET SIZE & OPPORTUNITY

BUSINESS MODEL & NETWORK EFFECTS

LAUNCH MODEL

Free

₹0

- Unlimited contacts
- 25 warm paths/month
- Graph visualisation
- Email channel

PILOT ACCESS

Paid

TBD with cohort

- All 5 channels
- Full AI queue
- Unlimited paths
- Team workspace

Free to grow the graph. Paid tier pricing locked in with first pilot cohort feedback — not guessed upfront.

The Data Flywheel

Every new user adds nodes to the global warm graph. Paths shorten, conversion rises, the network becomes impossible to leave. Identical to how LinkedIn's graph became irreplaceable.

NETWORK EFFECT FLYWHEEL

More Users

>

Bigger Graph

>

Better Paths

>

More Closes

Every intro sent strengthens the graph. The moat compounds with usage.

TRACTION & TEAM

WHAT EXISTS NOW

- ✓ Live MVP — pathfinding, AI personalisation, omnichannel all running
- ✓ Real graph pathfinding: not a recommendation engine, sub-100ms on demo graph
- ✓ 5 channels live: Email, LinkedIn, WhatsApp, Telegram, Meta Ads
- ✓ \$270K in platform credits: Anthropic, Vercel, AWS, GCP, GitHub

NEXT 90 DAYS

- Beta cohort: 8 BITS/IIT/IIM founders onboarding Aug 2026
- 3 pilot contracts in negotiation (2 B2B SaaS, 1 IT services firm)

Solo build: Full-stack MVP shipped in 3 months while working full-time at SeedlingLabs as SDE-1.
